<i>obs_h</i>	7,087	11,968	11,042	15,656	18,998	6,065

Notes: Panel A is defined by `ex_super=="t"`; Panel B by `ex_super=="f"`; Panel C imposes no `ex_super` restriction. No other restrictions are imposed. Column (1) uses side-specific MSE-optimal bandwidths with time fixed effects; column (2) doubles those bandwidths; columns (3)–(5) use bandwidths (0.2,0.1), (0.3,0.15), and (0.4,0.2); column (6) omits time fixed effects. Standard errors are clustered by listing ID. Both observation rows correspond to FULL only: *obs* is the raw sample size and *obs_h* is the number of observations inside the RD bandwidth.
