Notes: All samples impose `ex_super2==t`. Panel A is defined by `ex_super==t`. The sample is restricted to listings with at least 20 prior cumulative reviews. Column (1) uses MSE-optimal bandwidths with time fixed effects; column (2) doubles those bandwidths; columns (3)–(5) use (0.2,0.1), (0.3,0.15), and (0.4,0.2); column (6) omits time fixed effects. Standard errors are clustered by listing ID.

Notes: All samples impose `ex_super2==t`. The pooled sample imposes no `ex_super` restriction. The sample is restricted to listings with at least 25 prior cumulative reviews. Column (1) uses MSE-optimal bandwidths with time fixed effects; column (2) doubles those bandwidths; columns (3)–(5) use (0.2,0.1), (0.3,0.15), and (0.4,0.2); column (6) omits time fixed effects. Standard errors are clustered by listing ID.
